INTRODUCTORY

ALL period lanterns shown herein are made of cast aluminum finished in Bronze, Pewter and Verd Antique. They are packed individually, six in a container and wired. The color of glass is amber crackled emitting a soft mellow glow. Relamping is made easily accessible but tendencies of removing bulbs by undesirables limited.

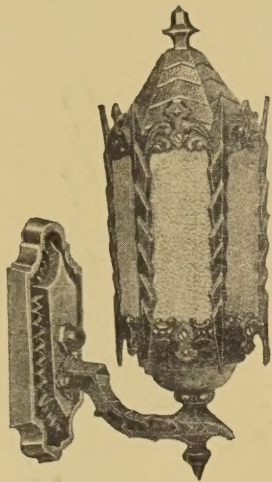

Neither the photographs nor description can convey the value and attractiveness of these lanterns. Your personal critical examination is invited for proof. We can safely say that the most exacting customers can be satisfied with the wide range of designs shown herein applicable to prevailing types of architecture.

SHEET METAL SOLDERED LANTERNS

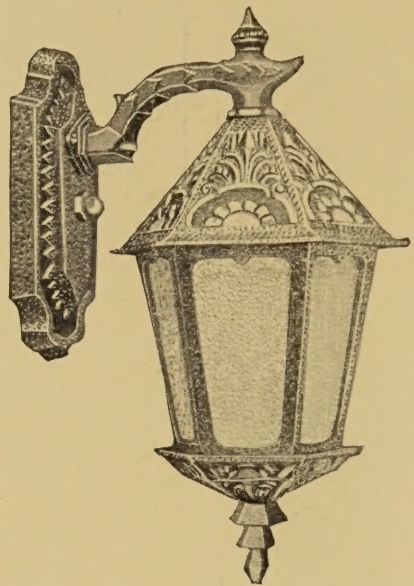

WE still make the sheet metal soldered lanterns for requisite purposes. Only the large lanterns are furnished wired. The smaller lanterns can also be furnished wired at an additional seventy-five cents per lantern, but in

standard containers only.

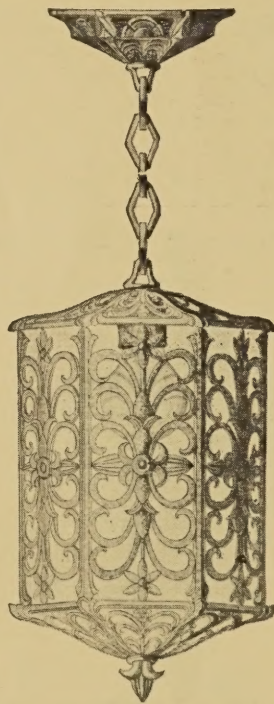

All the smaller lanterns are packed as heretofore, individually, unassembled. The finishes are also as heretofore, black on the lead cote lanterns and antique copper on the copper lanterns.
